**See your business  
in a new way**

# See your business in a new way. Realise the future of your business today.

To stay competitive in today's global economy, you need more than simple financial accountability and compliance.

Sage 300 contains the power and tools to help you see your business in a new way so you can improve productivity, envision success, and accelerate growth. It's time to turn your business dreams into reality with the real-time visibility, collaboration, agility, and innovation you need to succeed.

## Designed for growth

If your company wants to compete in today's fastpaced business arena, you need to control costs in order to maximise profitability. Sage 300 is a comprehensive, flexible business management solution designed to keep your total cost of ownership low by supporting multiple technologies, databases and operating systems. Available in multiple editions, Sage 300 gives you the opportunity to add users and adopt greater functionality as your business grows and offers built-in support for multiple languages and multicurrency transactions, so your business can comfortably reach around the globe.

# Customise and Personalise

Build your system to fit the demands of your business. Not the other way around.

Be the boss of your ERP system with customised, personalised software designed to meet your unique business requirements. Sage 300 was built to deliver customised ERP design and capabilities without the cost or headaches of traditional customisation. From on-site or cloud computing through Sage 300 Online to business-specific details to ongoing expansion, count on Sage 300 to integrate with your operating systems and databases and easily accommodate upgrades, product enhancements and new releases—and avoid incurring additional costs.

## Effortlessly customise your user interface with optional fields

Sage 300 is easy to set up and use, with intuitive wizards and a familiar interface that make configuration and navigation a breeze. Fulfill unique tracking and reporting requirements with the ability to add optional fields and capabilities. Define unlimited text, amount, date, time, integer, number and yes/no optional fields for use in all Sage 300 applications.

## Expand easily in the future

In addition to multilanguage, multicurrency, and multicompany capabilities, Sage 300 provides extended flexibility as your company grows. Multitier, scalable architecture allows 250+ concurrent users, as well as extensive customisation capabilities, an integrated development environment, and multi-OS/databases. Add functionality when you need to by adding modules or new user licenses—even moving to a larger edition smoothly when you're ready.

## Personalise to suit individual user needs

Numerous configuration options and built-in personalisation capabilities allow individual users to streamline navigation, reporting, and information access, improve productivity and reduce data entry errors.

# A collaborative ecosystem to help our customers thrive

*The core tenet of the Sage approach is that we provide customers with an unmatched range of expertise, support, training, collaboration and innovation.*

*Becoming part of this ecosystem – which includes Sage people, programs, and resources; a vibrant network of partners, consultants, and developers; authorised training facilities; and software user communities – enables our customers to get the most out of their investment.*

## Technical Support

Each Sage solution is backed by responsive support in the form of world-class call centres, online selfservice knowledge bases and other resources.

## Consultant and Partner Network

The Sage global partner network consists of 40,000 accountants and 26,000 business partners and consultants who share a common goal: to drive success for our customers from implementation to support.

## Sage Partner Solutions Source

Many challenges can be addressed by a core Sage solution or service. Others may require highly specialised add-on components developed within our development partner community that includes hundreds of independent software developers. For Sage Partner Solutions that make it easy to search for and capitalise on these innovations visit [www.sageerp.co.za](http://www.sageerp.co.za).

## Internet User Communities

These online resources enable product users to share tips and interact with one another through a variety of communication tools, including blogs and forums.

## Sage University

To help our customers improve their software proficiency, we offer a variety of training options through Sage University and affiliated authorised training centres. Courses are offered online, visit [www.sageerp.co.za](http://www.sageerp.co.za) for more information.

## Conferences

Each year, Sage hosts a user and partner conference to help customers and business partners build professional networks and refine their software skills in a rich, collaborative learning environment.
